The foundation

Service throughout the canton

The foundation «Pädagogisch-therapeutisches Zentrum» (pedagogical-therapeutic center) represents the interests of children, their guardians and families in the therapeutic context – to the general public as well as the authorities.
We provide our services throughout canton Basel-Landschaft.

Solid funding body

The foundation is funded by the GGB (non-profit organization Basel-Landschaft).

Our services

Services near you

Early remedial education: Binningen, Laufen, Liestal, Reinach
Psychomotor therapy: Allschwil, Binningen, Laufen, Liestal, Pratteln, Reinach, Sissach

Free services for children from canton BL

The services Early Remedial Education and Psychomotor Therapy are free for all children living in canton Basel-Landschaft. A service agreement between the foundation ptz BL and the canton governs matters of finance.

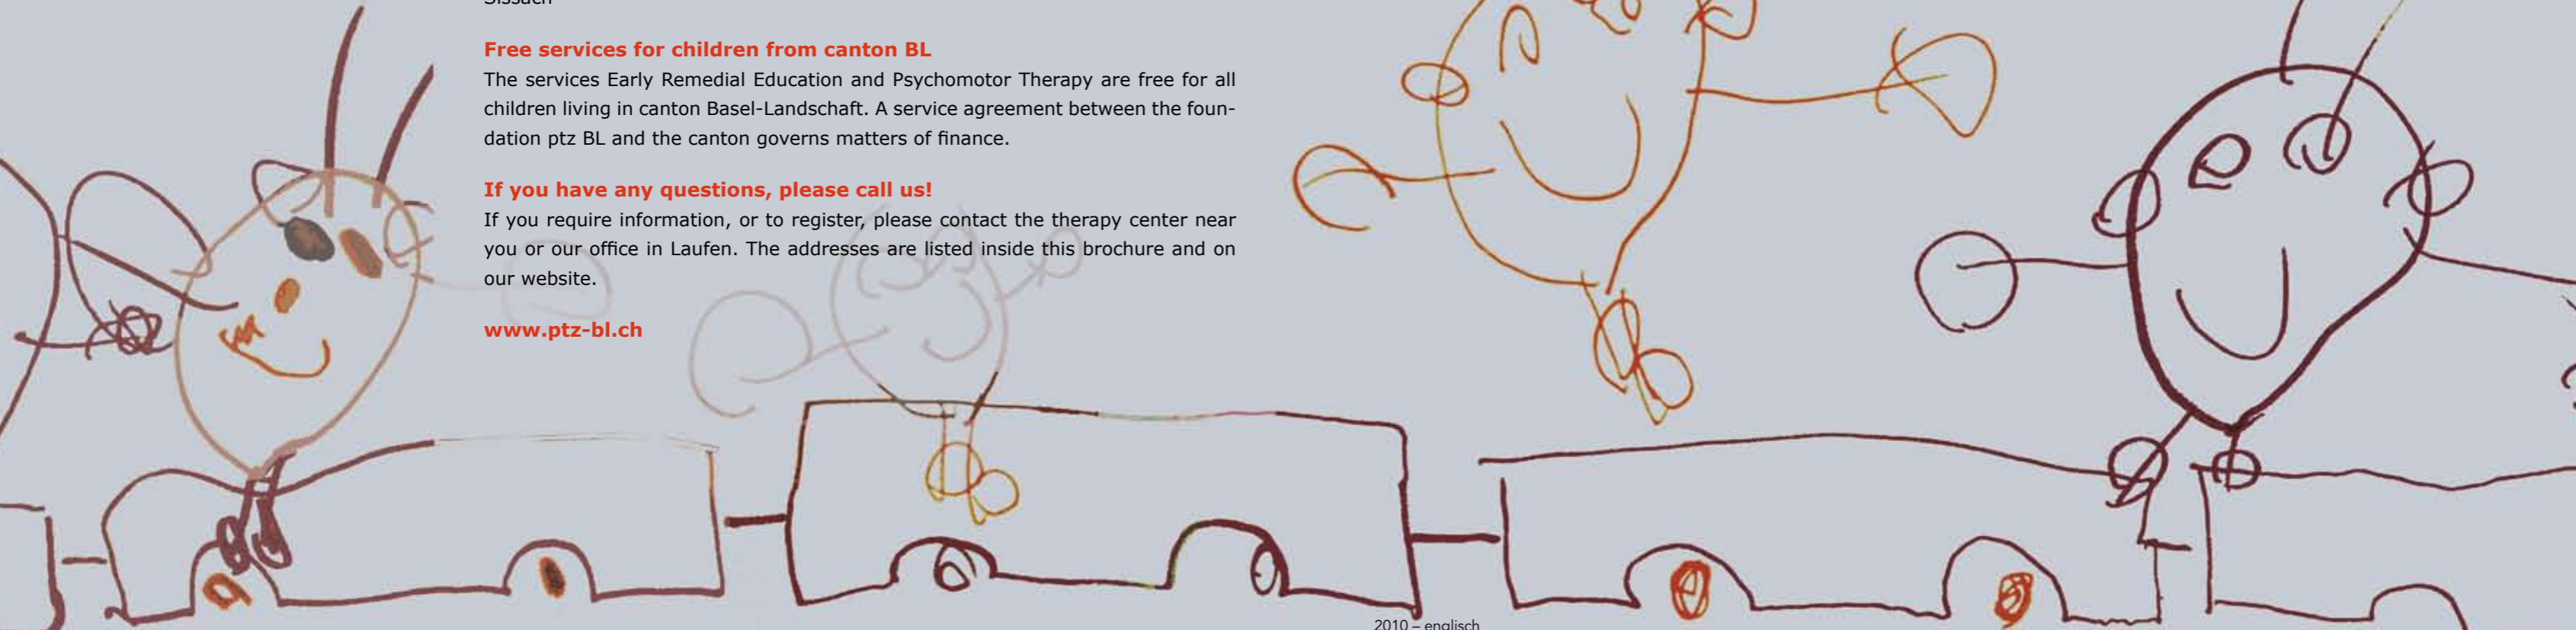

If you have any questions, please call us!

If you require information, or to register, please contact the therapy center near you or our office in Laufen. The addresses are listed inside this brochure and on our website.

Early remedial education (ERE) for children from birth

The earlier the support starts, the better the child's chances

Disabled children or children displaying unusual or late development can be supported individually and in accordance with their specific needs. Early remedial education can start when children are infants and continues until they start kindergarten.

Advice for parents, support for children

- psychological development assessment
- early remedial support for children:
 - individual support and remedial education playgroup
- home visits or outpatient service
- advice for attachment figures
- cooperation with experts

Support starting in the first few days

Early remedial education should begin as soon as the child displays unusual behavior:

- for children whose development generally lags behind
- for children whose language development lags behind
- for children displaying unusual behavioral
- for disabled children

Just give us a call!

We will be happy to discuss with you how to proceed. If it is advisable to take additional measures, a visit to the pediatrician will be necessary.

Psychomotor Therapy (PMT) for children from the age they start kindergarten

Support for children with unusual motor mannerisms

Some children are limited in their motor experience or have difficulties coordinating their movements. This is often accompanied by difficulties in their relationships with others. Psychomotor therapy helps children to feel themselves and others better and to train their sense of movement.

Assessment, advice, therapy

- psychomotor assessment
- individual or group therapy
- advice for attachment figures
- cooperation with experts
- observing classes and advice for teaching staff

More self-confidence through more secure movement

Psychomotor therapy is indicated in the following circumstances

- balance abnormalities and unusual movement coordination
- difficulties when it comes to making or building things, drawing, writing
- short attention and concentration span
- low self-esteem, anxious, self-conscious or infantile behavior
- difficulties in their dealings with other children
- agitation, disruptive behavior, difficulties with sticking to rules

Psychomotor therapy for your child?

On the request of parents,

- pediatricians
- neurologists or child psychiatrists
- Kinder- und Jugendpsychiatrischer Dienst BL (child and youth psychiatric service, KJPD)
- Schulpsychologischer Dienst (school psychologist service, SPD) register the child with us for psychomotor assessment.
